## ABOUT ME

Hello there! 🙋 I'm Kenneth, a passionate first-year college student with a love for web design and coding. I've embarked on a self-taught journey into web development, where I've delved into the fundamentals of HTML, CSS, and JavaScript. My excitement for creating seamless and visually appealing websites led me to explore the world of React.js.

## CURRENT ENDEAVORS

Studying Bachelor of Science in Information Technology at my local college and expanding my knowledge in Node.js, Figma, and soon will build a full stack web application.
